

The background of the slide is a solid blue color. Overlaid on this background are faint, semi-transparent white icons representing various Excel features: a line chart in the top right, a pie chart in the middle right, two circular progress indicators at the bottom right, and a list of bullet points on the left side. The main title 'EXCEL' is centered in a large, bold, white sans-serif font.

EXCEL

ASSIGNMENT 2

ROUTE

This assignment will help you practice the following Excel topics:

01 Lookup Functions

02 IF and nested IF

03 Logical Functions

CONTEXT

You are working in the HR department. Managers send employee numbers and ask for specific information to make decisions.

Use The Following: *given data*

LOOKUP FUNCTIONS

Using the **Lookup** sheet in the **xlsx** file, students must retrieve the requested information using lookup functions.

Question 1:

A manager wants to review compensation (Salary) for the following employees
Using **Vlookup**, return the following:

Employee No	Employee Name	Monthly Salary	Job Rate
-------------	---------------	----------------	----------

Question 2:

The HR department needs to identify where employees are located.
Using **Xlookup**, retrieve the following information:

Employee No	Employee Name	Country	Center
-------------	---------------	---------	--------

Question 3:

Sometimes HR receives an employee's name instead of their employee number.
Using **Xlookup**, find the following information:

First Name	Job Rate	Department	Annual Salary
------------	----------	------------	---------------

LOOKUP FUNCTIONS

Using the **Lookup sheet in the xlsx file**, students must retrieve the requested information using lookup functions.

Question 4:

Operations management wants to identify employees working the most overtime.
Using **Vlookup**, return the following:

Employee No	Department	Overtime Hours	Job Rate
-------------	------------	----------------	----------

Question 5:

The HR department wants to review how long certain employees have been working at the company.

Use Index and Match to retrieve the following information:

Employee No	Employee Name	Start Date	Years at the Company
-------------	---------------	------------	----------------------

Question 6:

The HR manager wants to investigate employee attendance

Use Index and Match to retrieve the following information:

Employee No	Employee Name	Sick Leaves	Unpaid Leaves
-------------	---------------	-------------	---------------

IF AND NESTED IF

Question 1:

HR wants to identify employees who worked significant overtime.

- Create a column called Overtime Status.
- If Overtime Hours > 100 → **"High Overtime"**
- Otherwise → **"Normal"**

Question 2: (Nested If)

Finance wants to classify employees based on Monthly Salary.

- Create a column called **Salary Category**.

Monthly Salary	Category
> 7000	High
4000–7000	Medium
< 4000	Low

Question 3:

HR wants to classify employee experience.

- Create a column called **Experience Level**.

Years	Level
≥ 10	Senior
5–9	Mid-Level
< 5	Junior

IF + LOGICAL FUNCTIONS

Question 1:

The company wants to identify employees who worked many overtime hours and have long experience.

- Create a column called **Hardworking Employee**.
- **Rule:** If $\text{Years} \geq 5$ **AND** $\text{Overtime Hours} > 50$, then "Yes"; otherwise "No"

Question 2:

HR wants to flag employees who have attendance concerns.

- Create a column called **Attendance Warning**.
- **Rule:** If $\text{Sick Leaves} > 3$ **OR** $\text{Unpaid Leaves} > 3$ then "Warning"; otherwise "OK"

Question 3:

Finance wants to determine bonus eligibility.

- Create a column called **bonus eligibility**.
- **Rule:** If $\text{Years} \geq 5$ **AND** $\text{Job Rate} \geq 3$ **AND** ($\text{Overtime Hours} > 50$ **OR** $\text{Monthly Salary} > 7000$) "Eligible" ; otherwise "Not Eligible"
